KEY TO SYMBOLS OF CLASSIFICATION IN YACHT REGISTER.

*𝔸1	Character of Yachts built of Iron with thicker plating than the Society's Rules *now* require.
𝔸1	Character of Yachts built of Iron according to the Society's Rules in force between the years 1864 and 1871.
A1	Without a numeral prefixed, character assigned to Iron Yachts already built to which the Society's Rules do not apply.
100A1	Character of Yachts built of Iron or Steel in accordance with or equal to the Society's Rules and Tables.
90A1	Character of Yachts built of Iron or Steel in some respects deficient of the requirements of the 100A class.
A1	Character of Wood or Composite built Yachts of the first class, well and sufficiently equipped. The figures prefixed to the character indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses indicate the expired term of years—originally if on the first line, and on continuation or restoration if on lower lines.
A......	Without a term of years indicates that the Yacht, though not built under Survey or according to the Society's Rules, is considered worthy of the class assigned.

1 ...... The figure 1 after a character signifies that the Yacht is well and efficiently equipped, as per Table 14.

† Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the same.

The figures under a character denote the date when the Vessel was last Surveyed.

When the Character is omitted from the twelfth column it indicates that the Character has expired or been withdrawn from absence of Survey, or on account of non-payment of fees due in the case.

The figure 1 after the letter A, Λ or A indicates that the equipment is in accordance with or equal to the Rules.

A line thus — after the letter A, Λ or A signifies that the equipment is *not* in accordance with the Rules.

The eleventh and twelfth Columns left blank, indicate that the Vessel has never been Classed in the Register Book. Three dots ... in Column 11 *indicate that the Vessel was at one time Classed by this Society, but that the Class has been withdrawn at owner's request. A black line with date under it in Column* 12 *indicates that, at that date, the Vessel,* from reported defects, *was not entitled to a Character in the Register Book. A red line with date under it in this Column indicates that the Class was withdrawn from non-compliance, at that date, with the Society's Rules.*

YACHT RACING ASSOCIATION.

INSTRUCTIONS FOR THE MEASURERS ISSUED BY DIRECTION OF THE COUNCIL.

Official Measurers shall take the measurements of Yachts in the manner hereinafter described.

All measurements should be taken and recorded in the Measurement Book twice, and a third time if there is any material disagreement.

A steel tape or rods must in all cases be used for taking the measurements.

Immediately the measurements to be taken are complete, the Measurer shall forward particulars of the same, together with the sail maker's diagram, if required, to the Secretary.

The Measurer shall not measure for the Yacht Racing Association a yacht or boat which he has designed or built, or which any firm he is interested in has designed or built; nor shall he measure any yacht in which he is interested as owner or otherwise.

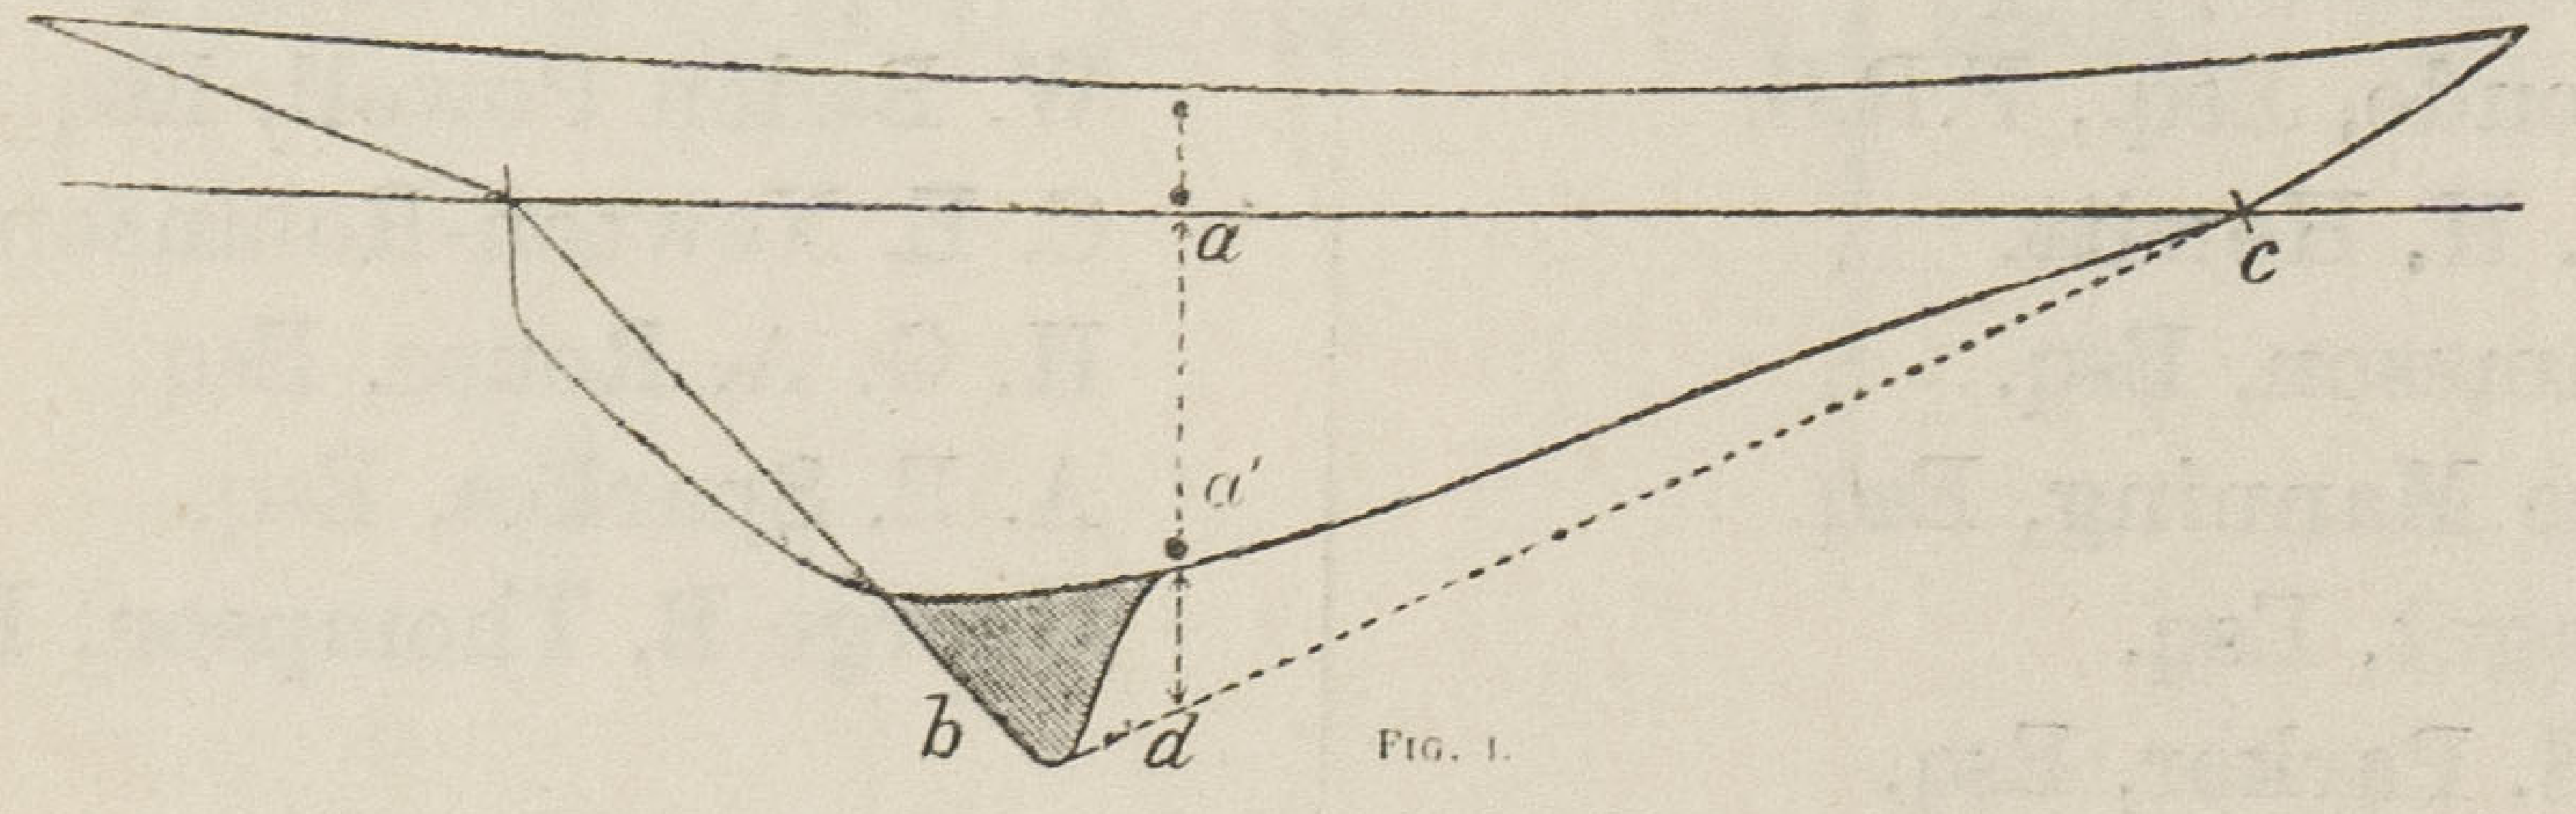

Fig. 1.

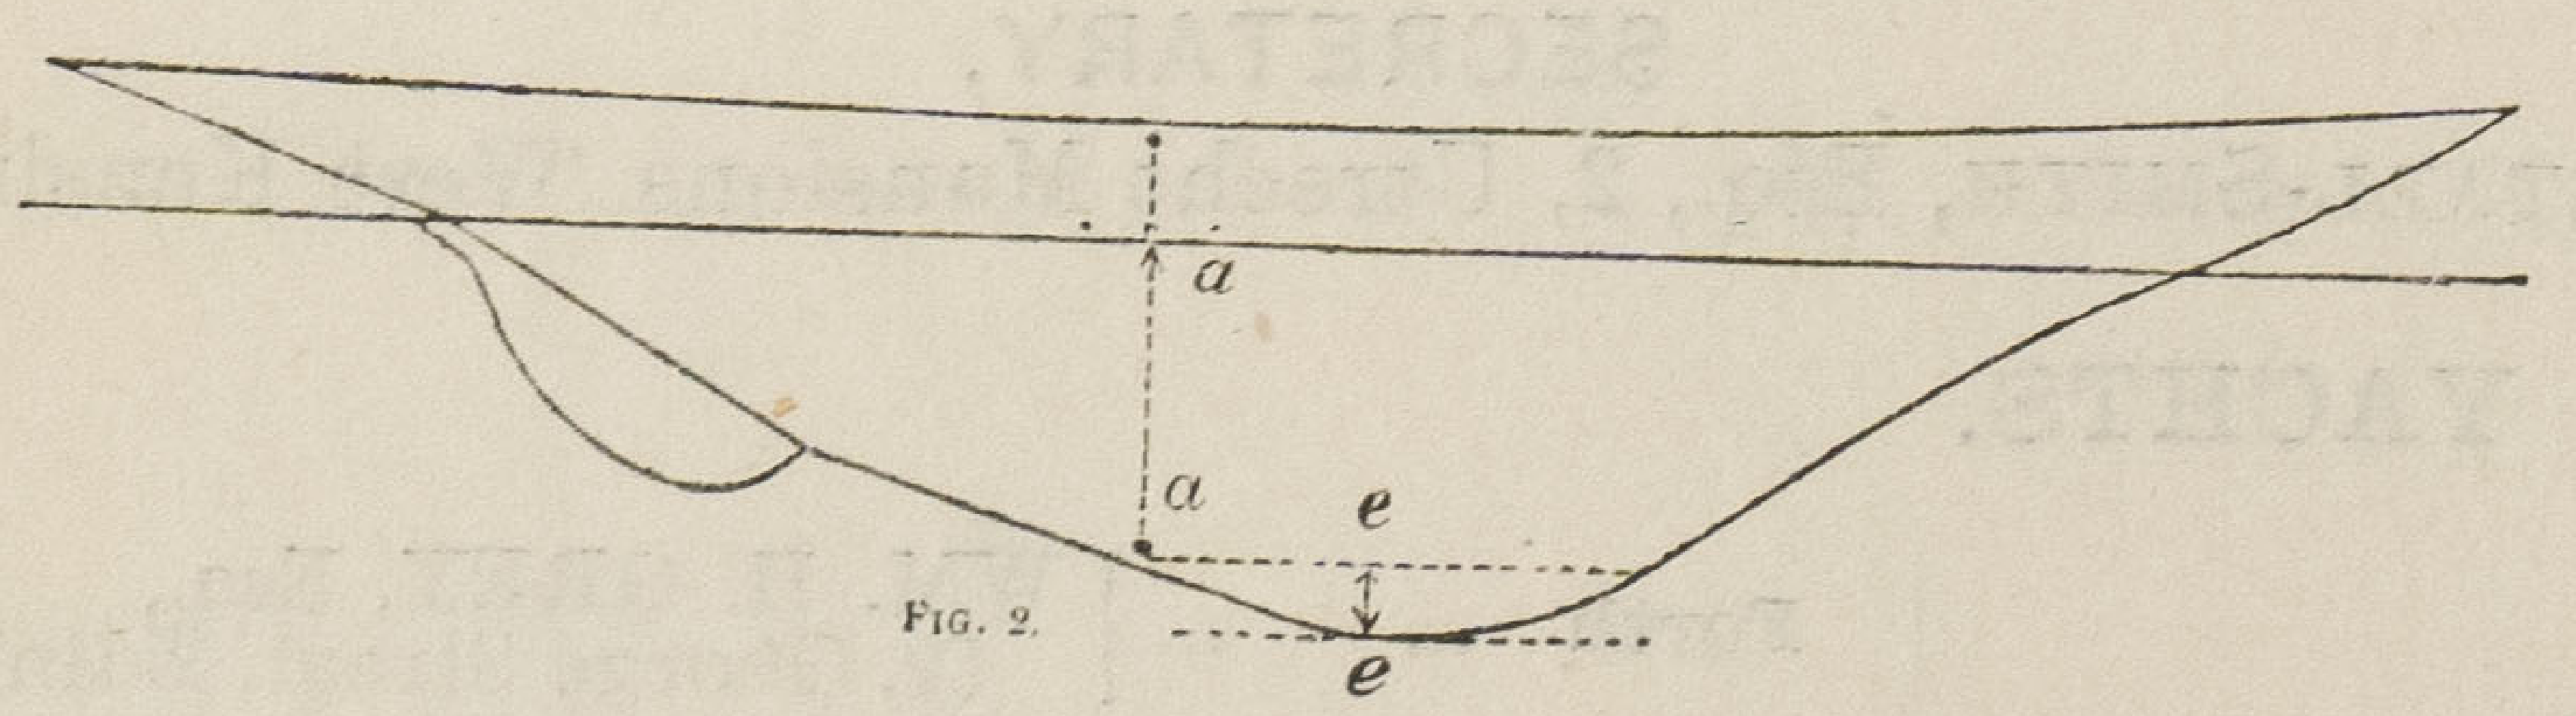

Fig. 2.

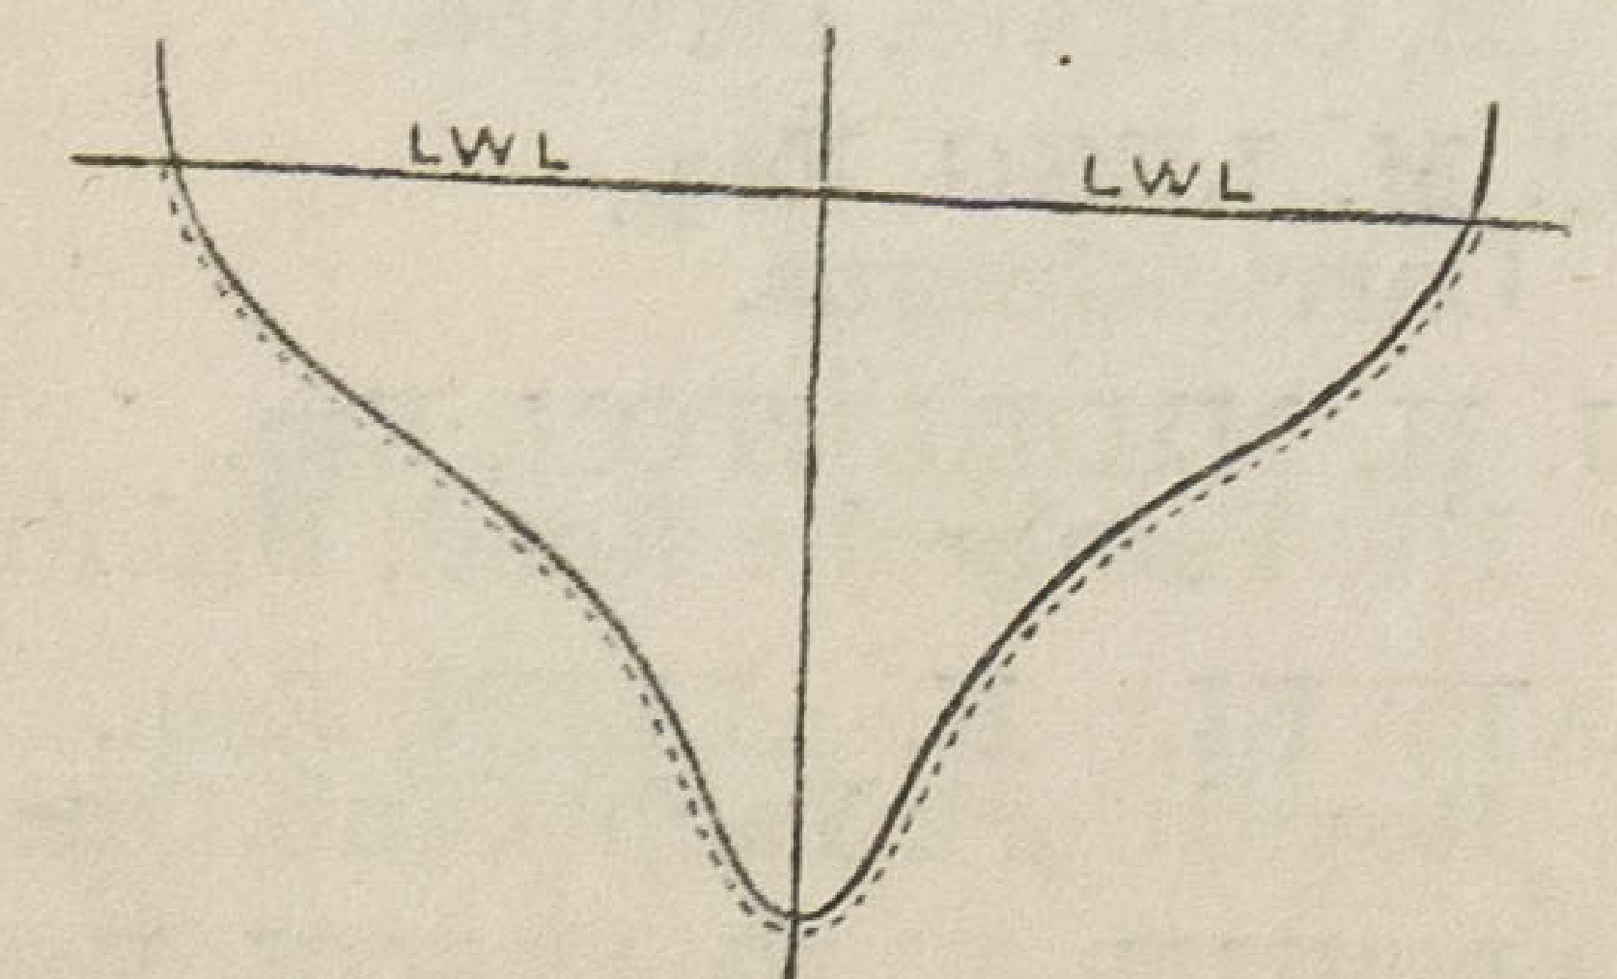

Fig. 3.

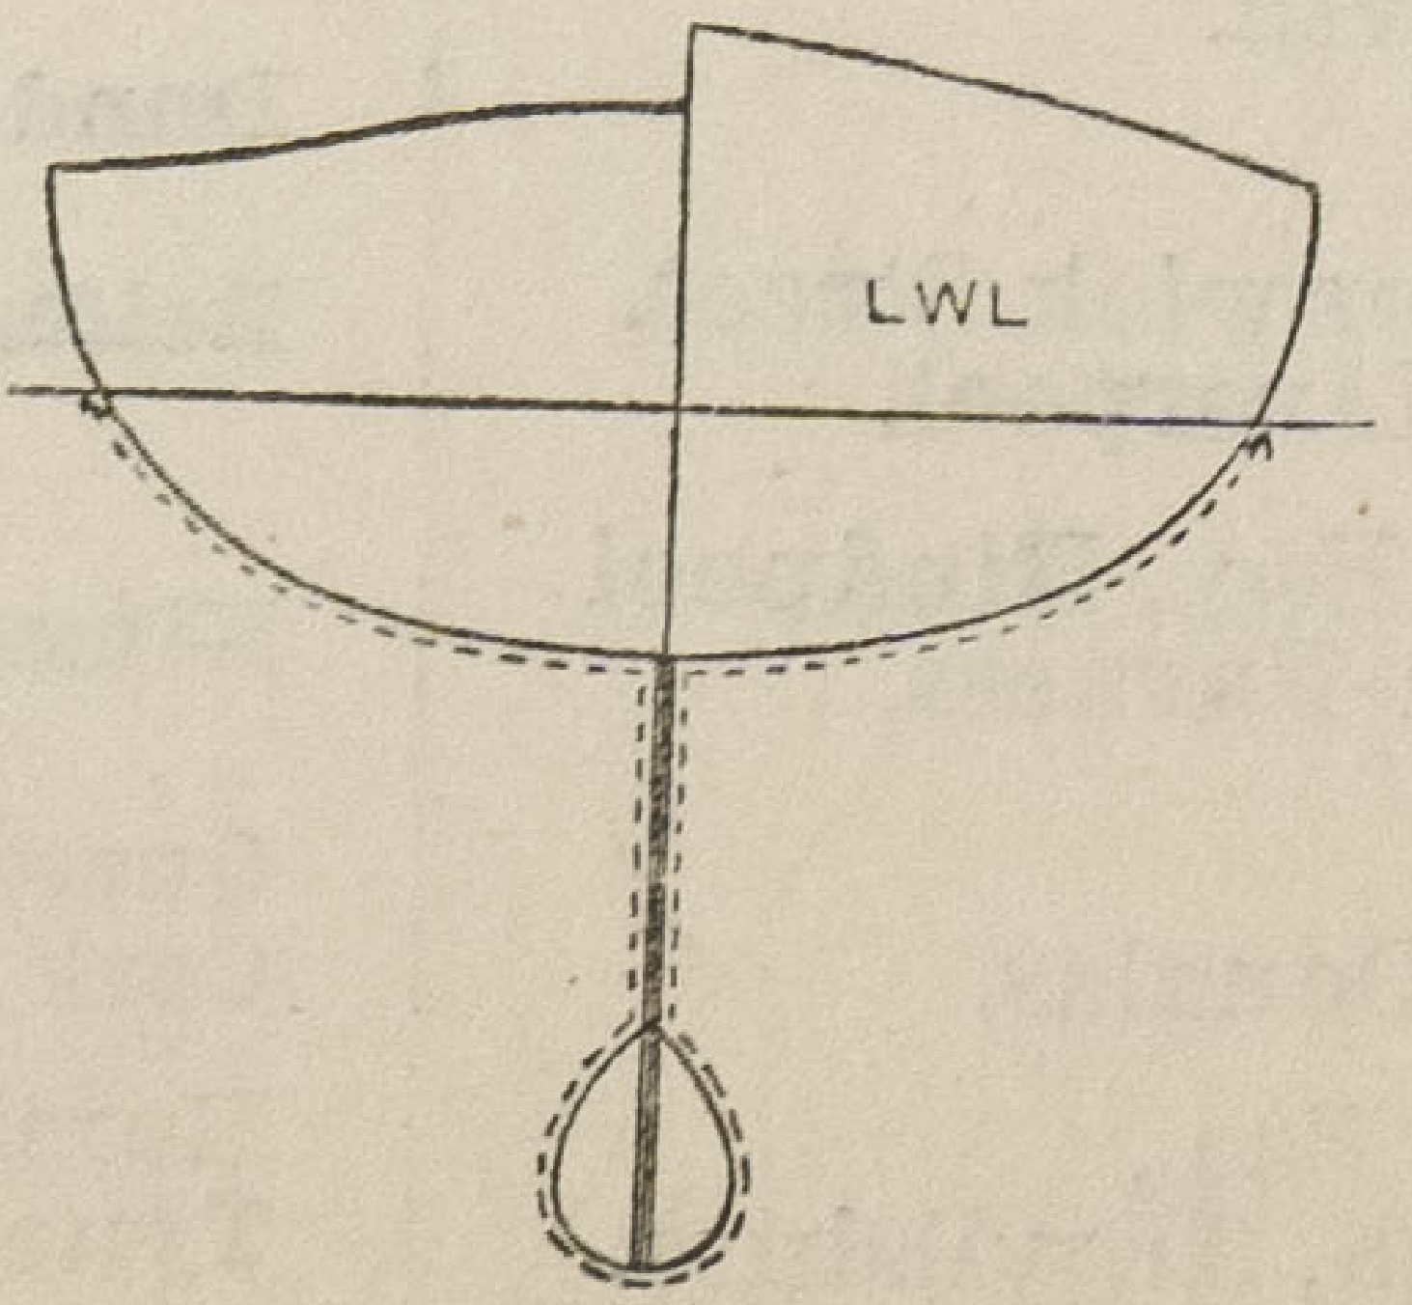

Fig. 4.

Before measurement the yacht must have on her length and girth marks, and before testing the marks and measurements, the Measurer must ascertain from the owner or his representative that the yacht is in her correct racing trim.

All sails, spars, gear, &c., as usually carried by the yacht when racing, must be on board, and also the usual racing crew when the measurements for the length, or girth, are being taken or checked.

The Measurer may allow sails, spinnaker gear, tackles, &c., to be put amidships whilst the measurements and marks for the length and the girth are being tested.

The measurements to be taken are the length, breadth and girth, and the lengths of the spars, or dimensions of sails, in accordance with the Yacht Racing Association Rules, for the rating of yachts.

LENGTH.

The length (L) for use in the formula shall be obtained by measuring the length over-all on deck, and deducting from this length the distances in to the bow and stern marks as fixed by the owner, from perpendiculars let fall from the bow and taffrail. These perpendiculars if measured when the yacht is afloat, are to be obtained by a hand lead sunk two or three fathoms deep, so as to ensure a steady line to measure from. The distances in from the line are to be taken by a rod placed parallel to the water surface.

After the over-all length has been taken the Measurer must see that the crew are placed at and about the mid over-all length. (See the extract from Rules overleaf.) He must then ascertain that the yacht is not immersed at the load water-line beyond the length represented by the owner's marks at the bow and stern.

If a yacht is measured in a tide way, the Measurer must view and verify the marks in smooth and during slack water; and the overhangs must be measured in smooth and during slack water.

If the measurement for length is obtained when the yacht is ashore the position of the bow and stern marks must be afterwards verified or checked when the yacht is afloat in racing trim, in smooth water, and before the particulars of the measurements is sent to the Secretary.

The over-all measurement must be taken parallel to the L.W.L. above the deck, starting from any convenient point forward on the rail, knee, &c., ahead of the fore end of the load water-line.

When the length over-all is taken with rods, a line should be stretched taut from the point forward to the taffrail to facilitate the accurate shifting of the rods.

BEAM.

The beam may be measured when the yacht is afloat or ashore. The beam shall be taken by means of a straight edge and plumb line.

YACHT RACING ASSOCIATION.

GIRTH.

The girth is to be taken from disc to disc (*a á*) at right angles to the load water-line under the keel, following the curve of the cross section as shown in Figs. 1, 2, 3 and 4, and must necessarily be measured when the yacht is on the stocks or laid ashore. When the marks are tested afloat the heights between such marks and the covering board must be compared with the measurements taken on shore.

The Measurer must take the distance between the disc nearest above the L.W.L. and the covering board or plank sheer on each side of the vessel and record it in the particulars of measurements furnished to the Secretary.

When the yacht is afloat for the other measurements, the Measurer shall accurately measure the distance between the girth disc nearest above the L.W.L. and the actual water-line level. This measurement shall be made on each side of the vessel, and shall be recorded in the particulars of measurements furnished to the Secretary.

The measurements must be taken when the yacht is afloat in smooth water, in racing trim and crew on board stationed amidship in accordance with the rule, and deducted from the girth as taken from disc (*a*) to disc (*á*).

In the case of a yacht being fitted with a centre board or lifting keel, the owner shall either block up the yacht so as to show the board or lifting keel lowered to its full extent, or shall furnish the Measurer with a true drawing to scale of such centre board or lifting keel lowered to its full extent.

SPARS AND SAILS.

In measuring the main boom length from the mast to the pin of out-haul shackle, the Measurer should see that the traveller, whether on a slide or round the boom, is chock out. For this purpose the clew of mainsail should be unshackled and the traveller hauled out to the farthest point to which it can be taken.

The Measurer should ascertain for himself the point on the bowsprit or cranse iron to which the base measurement for fore triangle must be taken.

In measuring the height for fore triangle, a piece of white linen should be attached to the ring of the tape, and the tape can be then hoisted by the signal halyards.

Before measuring a jackyard, the sail should be bent to it, or the foot laid parallel to the yard and fairly stretched; and, as a check, besides measuring the distance from the sheet to the outer lacing hole, the number of cloths from sheet to clew should be counted.

TRIM AND LENGTH MARKS.

The Measurer must take and record in the Measurement Book such notes of the yacht's trim and length marks, by measuring the height above water at the taffrail and stem or by such other means as will enable him at any subsequent date easily to ascertain if the immersion at the water-line or the marks at the bow and stern have been altered since measurement.

BALLAST.

If a yacht has movable ballast on board, the Measurer must note its position.

WEIGHT.

When measuring any yacht under 36 feet rating, the measurer must inform the owner, or his representative, that before the certificate can be issued, a declaration must be forwarded to the secretary of the Y.R.A., signed by the owner or builder, declaring that the weight of the yacht, when in measurement trim but without crew on board, exceeds 15 cwt.

Should a protest be lodged against any yacht on the alleged ground that she is less than 15 cwt. in weight, the parties concerned must make arrangements for the yacht to be weighed, and must refer such arrangements to the measurer of the district for his approval. The measurer must attend the weighing, and see that it is performed to his satisfaction; and either immediately before or after the weighing he must see the yacht floated with crew on board, and satisfy himself that she floats fairly to her marks as when measured, and with this object he must measure the height of the girth marks above the water-line, and compare the measurements with the figures on the certificate.

The measurer's fee for attendance at weighing, and all other expenses incidental to such weighing, must be paid by the unsuccessful parties to the protest.

N.B.—In the event of any difficulty arising under the fifth paragraph of these Instructions or otherwise, as to the measuring of any particular yacht, the Secretary shall make arrangements for the measuring of the yacht.

EXTRACT FROM RULE 62.

No certificate of rating shall be granted to any yacht of less than 15 cwt. displacement without crew.

RATING RULE.

The rating of every yacht entered to sail in a race, shall be ascertained by adding together length (L), beam (B), 0·75 of girth (G), and 0·5 of the square root of the sail area (SA), and dividing the sum by 2 according to the following formula:—

$$\frac{L + B + 0{\cdot}75\,G + 0{\cdot}5\,\sqrt{SA}}{2} = \text{Rating.}$$

In all ratings, figures in the second place of decimals below 0·05 shall be disregarded, and those of 0·05 and upwards shall count as 0·1.

Example of working:

L.W.L. = 45·6ft. Girth = 23·4.
Beam = 13·0. Sail Area = 2600.

The girth multiplied by ·75 is 17·55.

The square root of the sail area 2600 is 51, which multiplied by ·5 equals 25·5.

Then the sum will be:

L	45·60
B	13·00
$·75\,G$	17·55
$·5\sqrt{SA}$ ...	25·50
	2)101·65
	50·87=50·9 linear rating.

TO CALCULATE THE AREAS.

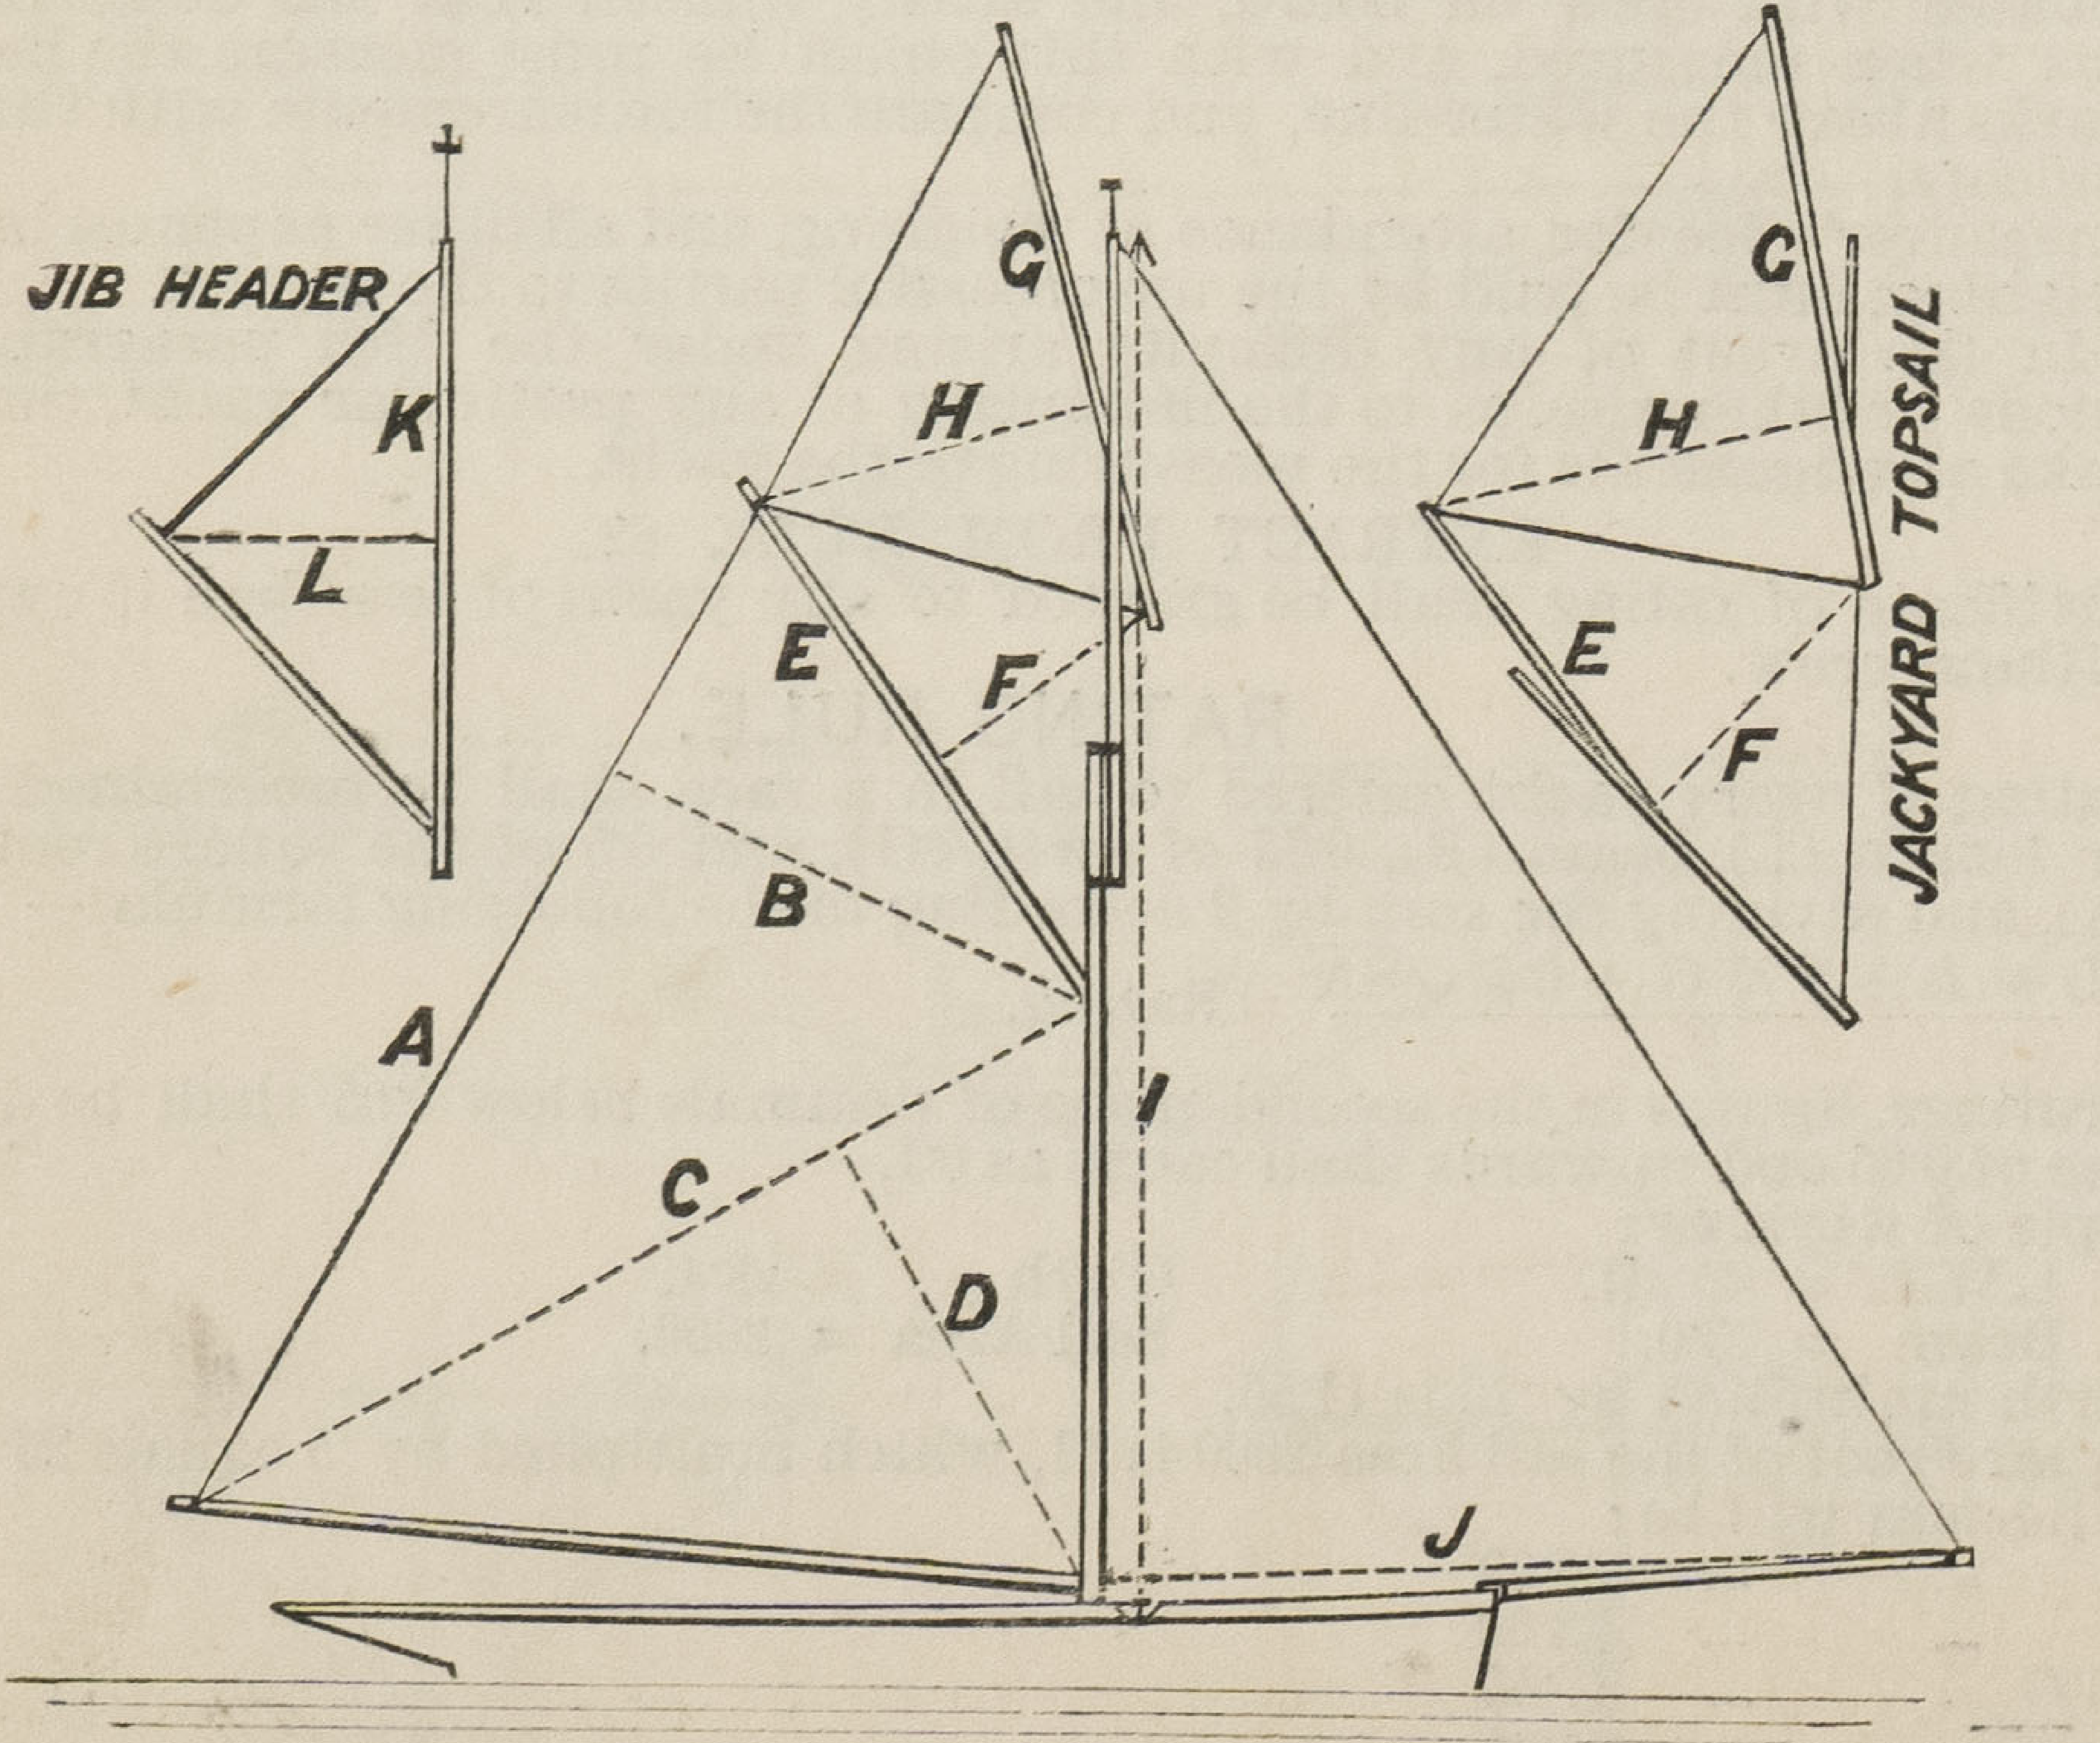
Mainsail.—To find the area of the mainsail—Multiply A by B and C by D, as per illustration, and add the two products together and divide by 2.

Yard Topsail.—To find the area of the yard topsail—Multiply E by F and G by H, as per illustration, and add the two products together and divide by 2.

Jib Header.—To find the area of jib header—Multiply K by L, as per illustration, and divide the product by 2.

Head Sails.—To find the area of head sails, jib topsail, or spinnaker—Multiply I (measured from the deck) by J, as per illustration, and divide by 2.

Pole Mast Head Sails.—To find the area of head sail, for pole mast—Multiply I by J, as per illustration, and divide by 2.



SCHOONER'S AND YAWL'S SAILS.

The area of a schooner's sail or a yawl's sail would similarly be found; in the case of a yawl having a lug mizen the lacing holes in the yard would be taken as the upper boundaries.

The cabin or cabins shall contain not less than two sofas upholstered and two sideboards or sideboard lockers and a table.

Water-tanks of not less than 15 gallons' capacity.

IN YACHTS EXCEEDING 42 FT. AND NOT EXCEEDING 52 FT. RATING—

Three complete transverse bulkheads of wood of average thickness at least ¾ inch, the spaces between to be fitted to form a forecastle and also one or more cabins.

The cabin or cabins shall contain not less than two sofas upholstered, or two standing cabin bunks fitted complete, two sideboards or sideboard lockers, one swing table, one fixed lavatory.

YACHT RACING ASSOCIATION.

Water tanks of not less than 20 gallons' capacity.

One fixed under-water W.C. fitted complete with all pipes and connections.

IN YACHTS EXCEEDING 52 FT. AND NOT EXCEEDING 65 FT. RATING—

Four bulkheads as described above, the spaces between to be fitted to form a forecastle, saloon and one or more other cabins.

The saloon to contain not less than two sofas upholstered, one swing table, two sideboards or sideboard lockers.

The cabins to contain not less than three standing cabin bunks fitted complete with two fixed lavatories.

Water-tanks of not less than 40 gallons' capacity.

Two W.C.'s as described above.

IN YACHTS EXCEEDING 65 FT. RATING—

Four bulkheads as described above, the spaces between as described for 65 ft. rating.

Saloon and cabins as described for 65 ft. rating, but cabins to contain not less than four standing cabin bunks.

Water-tanks of not less than 60 gallons' capacity.

Two W.C.'s as described above.

All Yachts exceeding 42 ft. rating shall have a fixed companion or ladder, and the forecastle furniture shall comprise cots or hammocks equal to the number of the crew, and the usual lockers, seats, cooking apparatus, &c.

The following shall apply to all Yachts starting in a Race :—

During a Race, the platforms shall be kept down and bulkheads standing, and all the other fittings above specified retained on board except cots, cushions and bedding; no water may be started from or taken into the tanks: no more than the usual anchors and chains may be carried; no bags of shot may be on board; all ballast must be properly stowed under the platforms or in lockers; and no ballast or other dead weights may be used as shifting ballast or for altering the trim of a Yacht.

No ballast shall be shipped, unshipped, or shifted, after 9 p.m. on the day previous to that on which the Race is sailed.

EXTRACT FROM RULES 24 & 25.

In Yachts of 42 ft. rating and under, the total number of persons on board during a match shall not exceed the number set forth in the following table :—

Not exceeding 18 ft. rating	2	persons.
Exceeding 18 ft. and not exceeding 24 ft. rating ...	3	„
Exceeding 24 ft. and not exceeding 30 ft. rating ...	5	„
Exceeding 30 ft. and not exceeding 36 ft. rating ...	7	„
Exceeding 36 ft. and not exceeding 42 ft. rating ...	9	„

If an owner elects to have his Yacht measured for rating length with a smaller number of persons on board than set forth in the foregoing table, such number shall be stated on the certificate of rating, and shall not be exceeded in any race sailed under the certificate.

In Yachts above 42 ft. rating there shall be no limit as to the number of paid hands, and no restrictions as to the number of friends.

TIME ALLOWANCES.

In preparing the new Time Scale the following equivalents between the ratings for the classes under the length and sail area rule, and the new Linear rating rule, have, on the recommendation of the yacht designers, been adopted :—

Ratings under length and sail area rule.	Equivalents under Linear rating scale.
0·5	18 ft.
1	24 „
2·5	30 „
5	36 „
10	42 „
20	52 „
40	65 „

85 rating, under the length and sail area rule, has also been taken as equivalent to 80 ft. rating under the new rule.

The time allowances from 24 ft. to 80 ft. rating correspond nearly with those of the previous scale, but small alterations have been introduced to make the figures accord with a true curve.

Above 80 ft. rating the time allowances accord with a tangent to the time scale curve from that point. This principle has been followed with the object of increasing the time allowances to be given by Yachts of the larger ratings.

In like manner the time allowances for ratings under 24 accord with a tangent to the curve from that point.

The allowance a Yacht has to make to any smaller Yacht is obtained by multiplying the difference between the times set against their respective ratings in the time tables, by the length of the course in knots. For example, the time a Yacht of 70 ft. rating has to allow a Yacht of 65 ft. rating, over a 50 knot course, is as follows :—

70 ft. ... 199·20
65 ft. ... 190·45

8·75
50

60)437·50

7 · 17·5 seconds.

When a fraction of a second equals or exceeds ·5 it is to be counted as a second, but fractions less than ·5 are to be disregarded. In the case illustrated above, the time allowance is, therefore, 7 minutes and 18 seconds.

If one of the Yachts is above and the other below 24 ft. rating, the time allowances in the two tables found from their respective ratings added together and multiplied by the length of the course, will give the time the larger allows the smaller Yacht.
